CLAIMS:

1.   A method (S100) of operating a recording device (10), said method comprising:

(S102) storing a recording (71) on a removable recording medium (70) as commanded by a user of the recording device (10);

(S104) adding interactivity to the recording as commanded by the user of the recording device (10); and

(S106) linking the recording (71) and an interactive module (72) based on the interactivity added to the recording (71).

2.   The method (100) of claim 1, further comprising:

(S108) storing the interactive module (72) on the removable recording medium (70), the interactive module (72).

3.   The method of claim 1, further comprising:

(S110) storing an interactive link (73) on the removable recording medium (70), the interactive link (73) representative of the linking of the recording (71) and the interactive module (72).

4.   A recording device (10), comprising;

means (41) for storing a recording (71) on a removable recording medium (70) as commanded by a user of said recording device (10);

means (42) for adding interactivity to the recording as commanded by the user of the recording device (10); and

means (41) for linking the recording (71) and the interactive module (72) based on the interactivity added to the recording (71).

5.   The recording device (10) of claim 4, further comprising:

means (41) for storing the interactive module (72) on the removable recording medium (70), the interactive module (72) corresponding to the interactivity added to the recording (71).

6. The recording device (10) of claim 4, further comprising:

means (41) for storing an interactive link (73) on the removable recording medium (70), the interactive link (73) representative of the linking of the recording (71) and the interactive module (72).
